

## Florida Arbovirus Surveillance Week 46: November 12-18, 2023

Arbovirus surveillance in Florida includes endemic mosquito-borne viruses such as West Nile virus (WNV), Eastern equine encephalitis virus (EEEV), and St. Louis encephalitis virus (SLEV), as well as exotic viruses such as dengue virus (DENV), chikungunya virus (CHIKV), Zika virus (ZIKV) and California encephalitis group viruses (CEV). Malaria, a parasitic mosquito-borne disease is also included. During the period of November 12-18, 2023, the following arboviral activity was recorded in Florida.

**WNV activity:** No human cases of WNV infection were reported this week. No horses with WNV infection were reported this week. Two sentinel chickens tested positive for antibodies to WNV this week in Volusia and Walton counties. No mosquito pools tested positive for WNV this week. In 2023, positive samples from seven humans, three asymptomatic blood donors, 228 sentinel chickens, one pheasant, and two horses have been reported from 20 counties.

**SLEV activity:** No human cases of SLEV infection were reported this week. One sentinel chicken tested positive for antibodies to SLEV this week in Pasco County. In 2023, six sentinel chickens have been reported from six counties.

**EEEV activity:** No human cases of EEEV infection were reported this week. Two horses with EEEV infection were reported this week in Highlands and Volusia counties. One sentinel chicken tested positive for antibodies to EEEV this week in Citrus County. In 2023, positive samples from 144 sentinel chickens, 14 horses, one sparrow, one laughing gull, and two humans have been reported from 22 counties.

**International Travel-Associated Dengue:** Sixteen cases of dengue were reported this week in persons that had international travel. In 2023, 458 travel-associated dengue cases have been reported.

**Dengue Cases Acquired in Florida:** Fourteen cases of locally acquired dengue were reported this week. In 2023, 142 cases of locally acquired dengue have been reported.

**International Travel-Associated Chikungunya Fever Cases:** No cases of chikungunya fever were reported this week in persons that had international travel. In 2023, one case of travel-associated chikungunya fever has been reported.

**Chikungunya Fever Cases Acquired in Florida:** No cases of locally acquired chikungunya fever were reported this week. In 2023, no cases of locally acquired chikungunya fever have been reported.

**International Travel-Associated Zika Fever Cases:** No cases of Zika fever were reported this week in persons that had international travel. In 2023, no travel-associated Zika fever cases have been reported.

**Zika Fever Cases Acquired in Florida:** No cases of locally acquired Zika fever were reported this week. In 2023, no cases of locally acquired Zika fever have been reported.

**Malaria Cases Acquired in Florida:** No cases of locally acquired malaria were reported this week. In 2023, seven cases of locally acquired malaria have been reported.

**Advisories/Alerts:** Bay, Hillsborough, Jefferson, Nassau, Okaloosa, Orange, Palm Beach, Polk, Sarasota, St. Johns, Suwannee, and Walton counties are currently under a mosquito-borne illness advisory. Broward, Escambia, Hardee, and Miami-Dade counties are currently under a mosquito-borne illness alert. No other counties are currently under a mosquito-borne illness advisory or alert.

There are currently multiple travel health notices from the Centers for Disease Control and Prevention related to mosquito-borne diseases.

Dengue			CHikungunya	Yellow Fever
Africa and the Middle East	Americas	Asia and the Pacific Islands	Africa	Africa
Burkina Faso	Argentina	Bangladesh	Burkina Faso	Nigeria
Chad	Colombia	Cambodia		
Côte d'Ivoire	Cuba	Laos		
Egypt	Guadeloupe	Malaysia		
Mali	Guatemala	Myanmar (Burma)		
Mauritius	Jamaica	Pakistan		
Sudan	Martinique	Philippines		
	Nicaragua	Sri Lanka		
	Panama	Taiwan		
	Peru	Thailand		
		Vietnam		

Level 1 Travel Health Notice, Level 2 Travel Health Alert: [wwwnc.cdc.gov/travel/notices](http://wwwnc.cdc.gov/travel/notices).

### 2023 Human Case Summary

**Eastern Equine Encephalitis Acquired in Florida:** In 2023, two cases of EEEV acquired in Florida have been reported in St. Johns (June) and Suwannee (July) counties.

**West Nile Virus Illnesses Acquired in Florida:** In 2023, seven cases of WNV illness acquired in Florida have been reported in 2023 from Escambia (July (2) and August (3)), Okaloosa (September), and Sarasota (September) counties. Three asymptomatic positive blood donors have been reported in Bay (August), Hillsborough (August), and Walton (September) counties.

**2023 International Travel-Associated Chikungunya cases:** One case with onset in 2023 has been reported in an individual with travel history to a chikungunya-endemic area in the two weeks prior to onset. County reporting case was: Lee. Country of origin was: Brazil.

**2023 International Travel-Associated Dengue Cases:** Four hundred and fifty-eight cases with onset in 2023 have been reported in individuals with travel history to a dengue-endemic area in the two weeks prior to onset. Counties reporting cases were: Alachua (2), Bay, Brevard, Broward (42), Collier (5), Duval (6), Escambia, Hendry (2), Hernando, Highlands, Hillsborough (25), Indian River (2), Lee (13), Leon, Manatee, Marion, Miami-Dade (276), Monroe (5), Nassau, Okaloosa, Orange (13), Osceola (5), Palm Beach (22), Pasco (2), Pinellas (3), Polk (7), Sarasota (3), Seminole (3), St. Johns (2), St. Lucie (6), and Volusia (4). Twenty-five cases were reported in non-Florida residents. Six cases met the criteria for severe dengue (dengue shock syndrome [DSS] or dengue hemorrhagic fever [DHF]). Those at greater risk for DSS and DHF include persons with previous dengue infection, pregnant women, infants, the elderly, and those with co-morbidities. However, severe illness can also occur in those without any of these risk factors. In 2023, 398 cases of dengue reported in Florida have been serotyped by PCR. Please see the table below for a breakdown of cases by country of origin and serotype.

Country of Exposure	DENV-1	DENV-2	DENV-3	DENV-4	DENV-1/ DENV-2	DENV-2/ DENV-3	DENV-3/ DENV-4	Unknown	Total
Argentina								1	1
Bahamas			2						2
Bangladesh		1	1						2

South America		1							1
Venezuela				1					1
<b>Total</b>	<b>30</b>	<b>37</b>	<b>305</b>	<b>20</b>	<b>1</b>	<b>2</b>	<b>3</b>	<b>60</b>	<b>458</b>

**2023 Dengue Cases Acquired in Florida:** In 2023, 142 cases of locally acquired dengue have been reported in Broward (4), Hardee (3), Miami-Dade (133), Palm Beach, and Polk counties with onsets in January, March, June (3), July (10), August (19), September (48), October (59), and November. Three cases were reported in non-Florida residents. One hundred and thirty-two cases have been serotyped by PCR. Please see the table below for a breakdown of cases by county and serotype.

County of Exposure	DENV-1	DENV-2	DENV-3	Unknown	Total
Broward		3	1		4
Hardee	3				3
Miami-Dade		7	116	10	133

Polk			1		1
<b>Total</b>	<b>3</b>	<b>11</b>	<b>118</b>	<b>10</b>	<b>142</b>

**2023 International Travel-Associated Malaria Cases:** Sixty-seven cases of malaria with onset in 2023 have been reported in individuals with a travel history to a malaria-endemic area. Counties reporting cases were: Brevard, Broward (9), Collier, Duval (2), Hillsborough (8), Jackson, Lake (2), Lee (3), Leon (3), Manatee, Miami-Dade (10), Okaloosa, Orange (4), Osceola (2), Palm Beach, Pasco, Pinellas (4), Polk (3), Sarasota (3), Seminole (2), St. Lucie (2), Volusia (2), and Walton. Fourteen cases were reported in non-Florida residents. Please see the table below for a breakdown of cases by country of origin and *Plasmodium* species.

Country of Exposure	<i>Plasmodium falciparum</i>	<i>Plasmodium vivax</i>	<i>Plasmodium malariae</i>	<i>Plasmodium ovale</i>	Total
Angola			1		1
Burkina Faso	1				1
Burundi	1				1

Sudan		1			1
Tanzania	1				1
Uganda	7				7
Venezuela		1			1
Multiple countries		7			7
<b>Total</b>	<b>49</b>	<b>14</b>	<b>3</b>	<b>1</b>	<b>67</b>

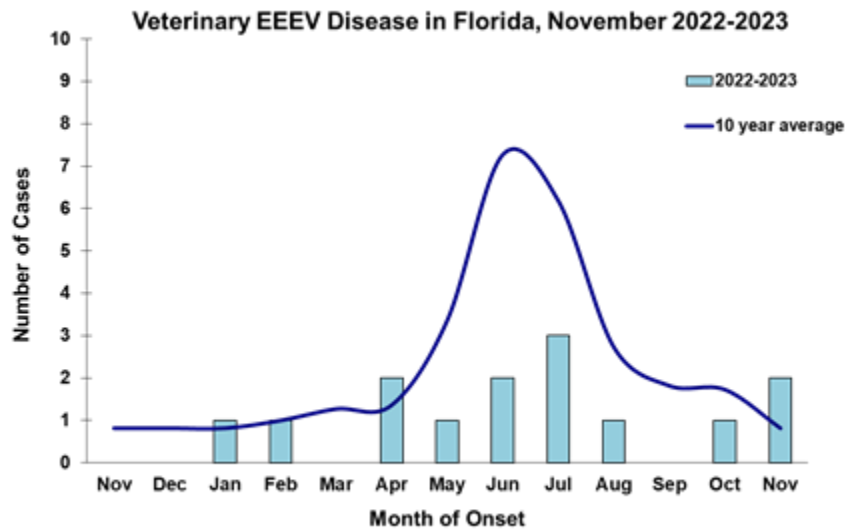

**2023 Malaria Cases Acquired in Florida:** In 2023, seven cases of locally acquired malaria have been reported in Sarasota County, with onsets in May, June (5), and July. The *Plasmodium* species reported were *Plasmodium vivax*.

### Veterinary Cases\*\*

\*\*Veterinary cases are reported by date of onset. Only mammalian veterinary cases are included in the graphs.

Two horses with EEEV infection were reported this week in Highlands and Volusia counties.

### Sentinel Chickens

The table below is for the reporting of confirmatory laboratory results from this week. Some of the samples were collected at earlier dates. The date of collection is recorded for samples collected on that day along with the total number of positives and the corresponding seroconversion rate for the week the sample was collected.

Two sentinel chickens tested positive for antibodies to WNV this week in Volusia and Walton counties. One sentinel chicken tested positive for antibodies to SLEV this week in Pasco County. One sentinel chicken tested positive for antibodies to EEEV this week in Citrus County.

County	Collection Date	Seroconversion Rates (%)						County Totals	
		Flavi	SLEV	WNV	Alpha	EEEV	HJV	Collection Week	YTD
Citrus					1.52	1.52		1 EEEV	12 EEEV, 2 WNV
Pasco		1.69	1.69					1 SLEV	1 EEEV, 1 SLEV
Volusia		2.04		2.04				1 WNV	8 EEEV, 11 WNV, 1 SLEV
Walton		3.45		3.45				1 WNV	54 WNV, 38 EEEV, 6 HJV, 1 SLEV

### Sentinel Seroconversions to WNV in Florida, 2022–2023

### Sentinel Seroconversions to EEEV in Florida, 2022–2023

### Mosquito Pools

No mosquito pools tested positive for WNV or EEEV this week.

County	Collection Date	Result	Species	County YTD
--------	-----------------	--------	---------	------------

## Dead Birds

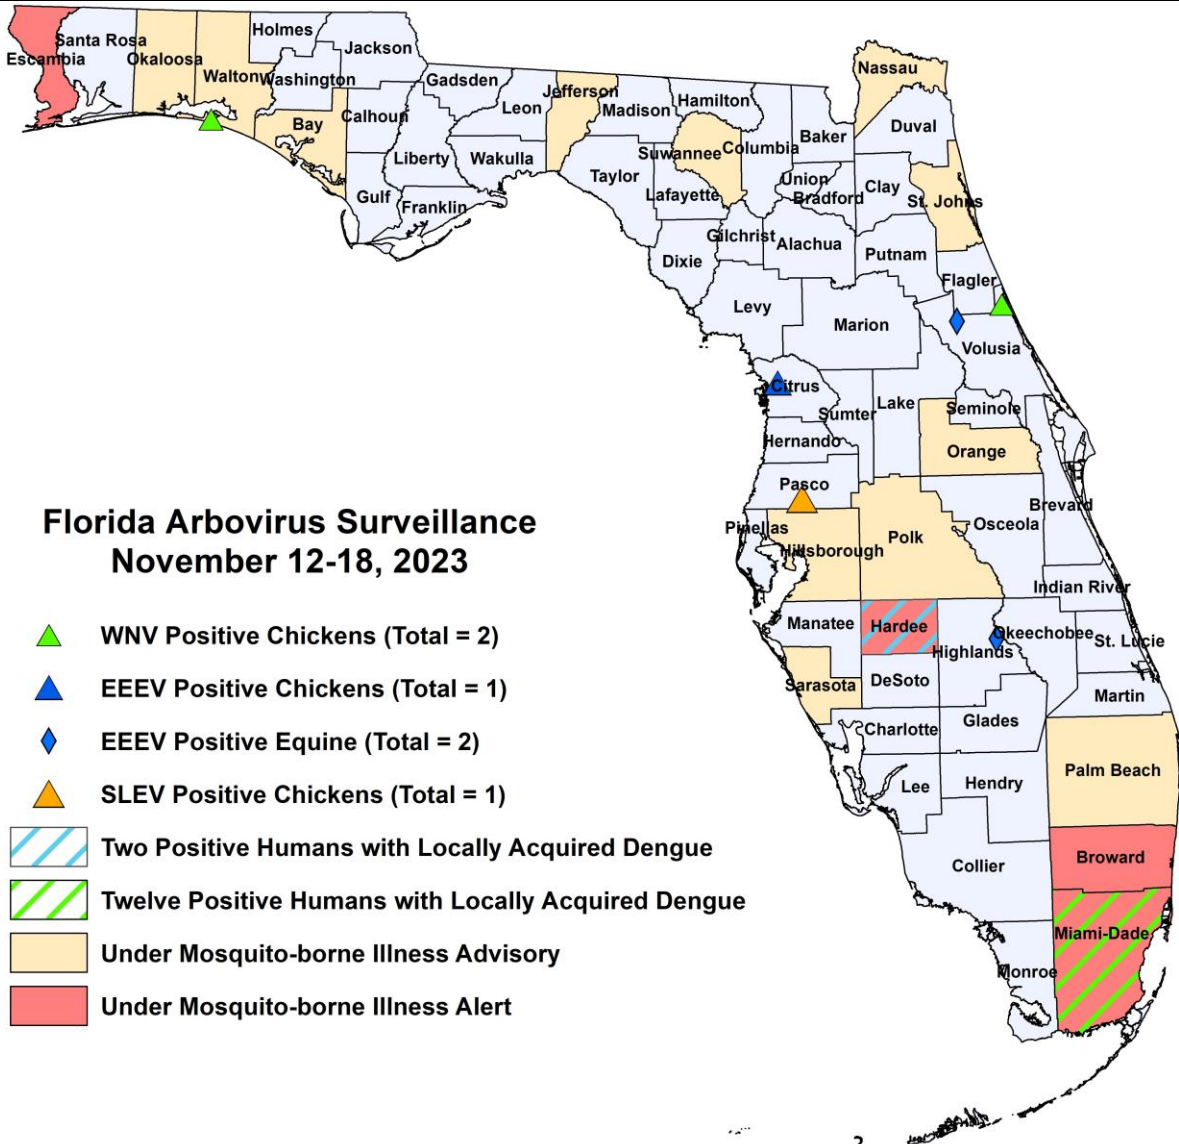

The Fish and Wildlife Conservation Commission (FWC) collects reports of dead birds, which can be an indication of arbovirus circulation in an area. This week, 34 reports representing a total of 71 dead birds, including two doves, were received from 11 counties.

In 2023, 919 reports representing a total of 2393 dead birds (52 crows, 51 jays, 139 raptors, 169 doves) were received from 52 of Florida's 67 counties.

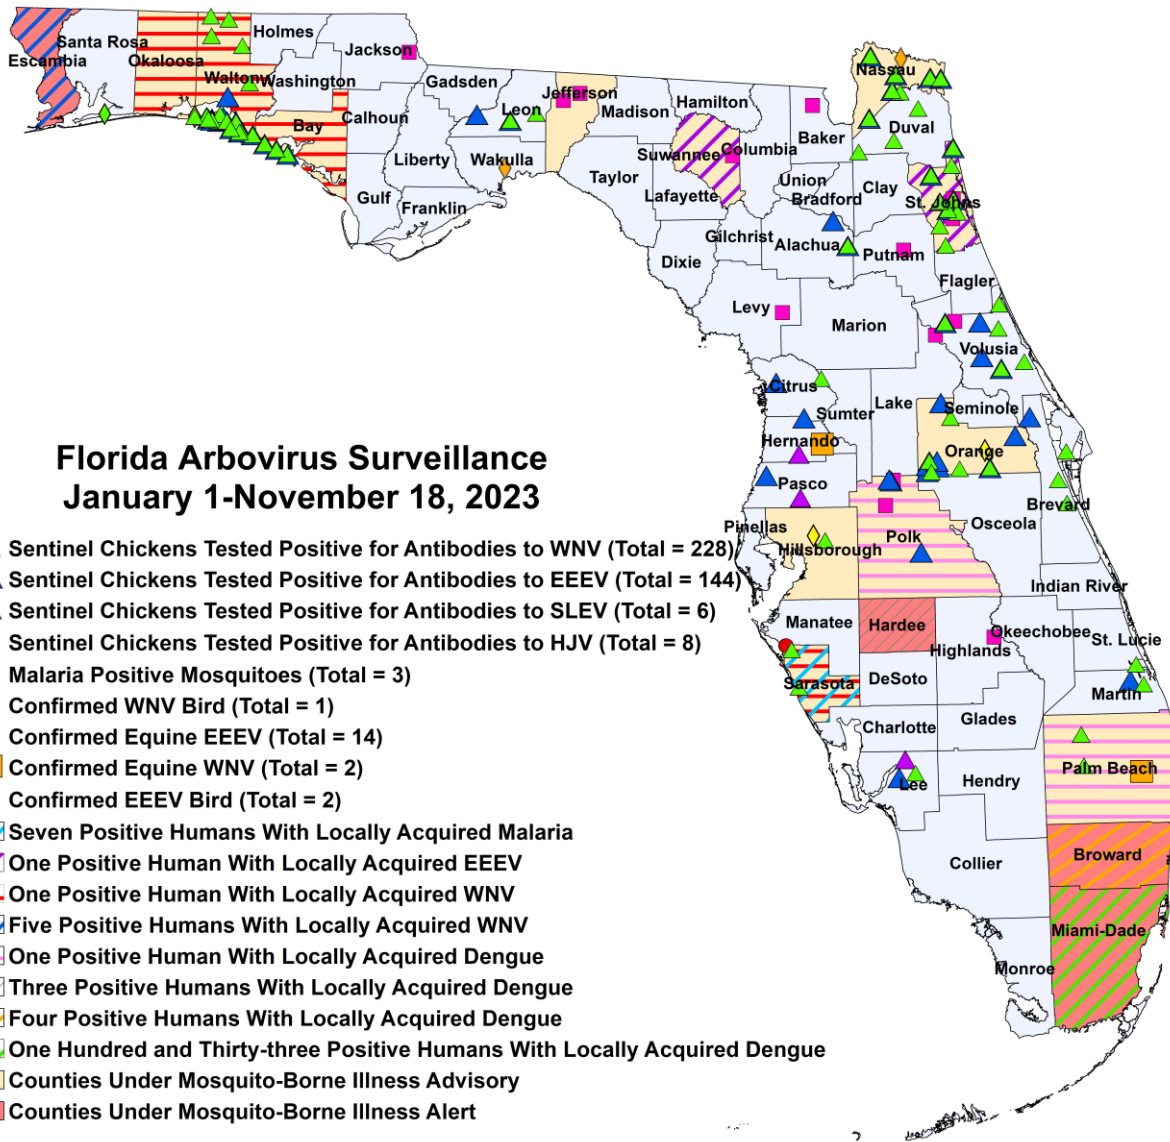

### 2023

County	Total Dead Birds	Crows	Jays	Raptors	Doves
Alachua	1	0	0	0	0
Bay	1	0	0	0	0
Charlotte	1	0	0	0	0
Collier	14	0	0	0	0

## Florida Arbovirus Surveillance January 1-November 18, 2023

- ▲ Sentinel Chickens Tested Positive for Antibodies to WNV (Total = 228)
- ▲ Sentinel Chickens Tested Positive for Antibodies to EEEV (Total = 144)
- ▲ Sentinel Chickens Tested Positive for Antibodies to SLEV (Total = 6)
- ◆ Sentinel Chickens Tested Positive for Antibodies to HJV (Total = 8)
- Malaria Positive Mosquitoes (Total = 3)
- ◆ Confirmed WNV Bird (Total = 1)
- Confirmed Equine EEEV (Total = 14)
- Confirmed Equine WNV (Total = 2)
- ◆ Confirmed EEEV Bird (Total = 2)
- Seven Positive Humans With Locally Acquired Malaria
- One Positive Human With Locally Acquired EEEV
- One Positive Human With Locally Acquired WNV
- Five Positive Humans With Locally Acquired WNV
- One Positive Human With Locally Acquired Dengue
- Three Positive Humans With Locally Acquired Dengue
- Four Positive Humans With Locally Acquired Dengue
- One Hundred and Thirty-three Positive Humans With Locally Acquired Dengue
- Counties Under Mosquito-Borne Illness Advisory
- Counties Under Mosquito-Borne Illness Alert

### 2023 Mosquito-Borne Disease Activity by County

County	Humans	Equines	Sentinel Chickens	Other
Alachua			7 EEEV (6/19, 7/17, 8/1, 8/9, 8/23) 2 WNV (10/9)	
Baker		1 EEEV (5/5)		
Bay	1 WNV asymptomatic blood donor (August)		6 EEEV (5/15, 5/22, 5/30, 6/12) 14 WNV (7/17, 7/31, 8/21, 8/24, 9/11, 9/18, 10/2, 10/16)	
Brevard			1 EEEV (3/24) 4 WNV (8/3, 10/5, 10/19)	
Broward	4 dengue (July (2), August, September)			
Citrus			2 EEEV (4/24, 11/6) 2 WNV (10/16)	
Duval			12 WNV (7/17, 9/11, 9/18, 9/25, 10/2, 10/9)	
Escambia	5 WNV (July (2), August (3))			
Hardee	3 dengue (July, October, November)			

County	Humans	Equines	Sentinel Chickens	Other
Hernando		1 WNV (1/6)	1 SLEV (10/16)	
Hillsborough	1 WNV asymptomatic blood donor (August)		3 WNV (2/28, 3/7, 5/2) 1 HJV (7/18)	
Jackson		1 EEEV (7/28)		
Jefferson		2 EEEV (6/22, 6/30)		
Lake		1 EEEV (1/29)		
Lee			1 EEEV (1/9) 1 SLEV (10/9) 1 WNV (10/16)	
Leon			8 EEEV (7/6, 8/1, 8/7, 8/22, 9/19, 10/2, 10/31) 4 WNV (8/7, 8/15, 9/19)	
Levy		1 EEEV (10/8)		
Martin			1 EEEV (8/4) 2 WNV (10/6, 10/13)	
Miami-Dade	133 dengue (January, March, June (3), July (6), August (18), September (46), October (58))			
Nassau			43 EEEV (6/2, 6/16, 6/23, 7/7, 7/15, 7/21, 8/11, 8/18, 8/31, 9/8, 9/15, 9/22, 9/29, 10/14) 46 WNV (8/4, 8/11, 8/18, 8/31, 9/8, 9/22, 9/29, 10/7, 10/14, 10/20, 10/27)	1 EEEV sparrow (6/24)
Okaloosa	1 WNV (September)			
Orange			4 WNV (2/20, 7/10, 8/28, 10/2) 19 EEEV (1/17, 2/20, 2/27, 4/10, 4/24, 5/1, 5/15, 5/30, 6/5, 7/10, 7/17, 8/1, 10/2) 1 HJV (5/8)	
Palm Beach	1 dengue (September)	1 WNV (10/4)	10 WNV (4/18, 9/1, 9/18, 9/25, 10/9, 10/16, 10/23)	
Pasco			1 EEEV (4/24) 1 SLEV (11/6)	
Polk	1 dengue (July)	2 EEEV (4/7, 4/10)	4 EEEV (5/22, 5/26, 7/24, 10/23)	
Putnam		1 EEEV (7/31)		
Santa Rosa				1 WNV pheasant (8/29)
Sarasota	7 malaria (May, June (5), July) 1 WNV (September)		2 WNV (9/15, 10/17)	3 <i>Plasmodium vivax</i> mosquitoes ( <i>Anopheles crucians</i> [6/1, 6/2, 6/5])
Seminole			2 WNV (9/11, 9/26)	
St. Johns	1 EEE (June)	2 EEEV (2/2, 7/6)	5 EEEV (6/12, 6/26, 7/31, 8/21) 54 WNV (7/5, 7/10, 7/17 7/31, 8/7, 8/14, 8/21, 8/28, 9/5, 9/11, 9/18, 9/25, 10/2, 10/9, 10/16, 10/23) 1 SLEV (10/30)	
Suwanee	1 EEE (July)	1 EEEV (8/21)		

County	Humans	Equines	Sentinel Chickens	Other
Volusia			8 EEEV (1/17, 1/23, 1/30, 4/10, 4/17, 6/12, 7/17) 11 WNV (7/3, 8/14, 9/5, 9/11, 9/25, 10/2, 10/30, 11/6) 1 SLEV (9/25)	
Wakulla				1 EEEV laughing gull (8/1)
Walton	1 WNV asymptomatic blood donor (September)		54 WNV (3/27, 7/24, 7/31, 8/7, 8/8, 8/14, 8/15, 8/21, 8/22, 8/28, 8/30, 9/11, 9/12, 9/18, 9/25, 10/2, 10/3, 10/9, 10/16, 10/23, 10/30, 10/31, 11/6) 38 EEEV (4/3, 4/10, 5/8, 5/30, 6/5, 6/12, 6/19, 6/26, 6/28, 7/3, 7/11, 7/17, 7/24, 8/8, 8/14, 9/26) 6 HJV (5/8, 5/22, 6/12, 8/21) 1 SLEV (7/31)

**For more surveillance information, please see the DOH website at:** [www.floridahealth.gov/diseases-and-conditions/mosquito-borne-diseases/surveillance.html](http://www.floridahealth.gov/diseases-and-conditions/mosquito-borne-diseases/surveillance.html)

**For arbovirus surveillance information for the United States, please see the Centers for Disease Control and Prevention website at:** [www.cdc.gov/ncidod/dvbid/westnile/surv&control.htm](http://www.cdc.gov/ncidod/dvbid/westnile/surv&control.htm)

Case tallies included in the weekly Florida arbovirus surveillance report include confirmed and probable cases for EEE, WNV infection, SLE, dengue, chikungunya, and malaria by date of onset. Suspect cases are not included. Activity is mapped by county of exposure rather than county of residence. Case definitions being used in Florida are consistent with national criteria provided by the Council of State and Territorial Epidemiologists (CSTE) and may be viewed at: [www.floridahealth.gov/diseases-and-conditions/disease-reporting-and-management/disease-reporting-and-surveillance/index.html](http://www.floridahealth.gov/diseases-and-conditions/disease-reporting-and-management/disease-reporting-and-surveillance/index.html). Case tallies reported by CDC do not include suspect cases and cases are reported by patient state of residence rather than where the exposure occurred. Data is provided by county health departments, Department of Health Bureau of Public Health Laboratories, Department of Agriculture and Consumer Services, mosquito control agencies, Florida Fish and Wildlife Conservation Commission, medical providers and veterinarians. Equine cases are provided by the Department of Agriculture and Consumer Services.
